

Discover ecotest

Sustainable, efficient and cost-economising

What is the **carbon footprint** of your recycling **process**?

How many **raw materials** do you **save by** recycling?

Are you **maximising** your company's **profits**?

Ecotest helps!

- Optimise your carbon footprint, recycling performance and profits
- Sustainable image, results that are useable for marketing & sales
- Helps improve compliance
- Benchmark information
- Transparent insight into investment decisions
- Support via the Ecotest expertise centre

Case study: Economise on a large scale with Ecotest

Stibat has started using **Ecotest** because it wants to keep its **carbon footprint** to a minimum. Ecotest is a management decision tool that **makes use** of LCA-techniques, ISO 14040 and SimaPro software. Stibat is currently **optimising** its chain with Ecotest. The great thing is that your company can use Ecotest too. And **the best** news of all: you will **benefit**, no matter what.

Moving with the times

Just imagine having insight into your carbon footprint in relation to your recycling performance, more profits and a more positive image. In a climate in which doing business in a socially responsible way is becoming increasingly important, it is essential to have the right knowledge and take the right action within your company – no matter what branch you are in.

Balance

Ecotest quantifies the impact of your company based on four indicators: effect on climate, preservation of raw materials, toxicity and profitability. These key values apply to all sorts of elements within your organisation and they must be properly balanced. This is where Ecotest can help you.

Insight

Ecotest provides you not only with insight into your environmental performance and therefore with the potential for profit, but also enables you to demonstrate your company's performance to potential business partners, compliance organisations and governmental authorities. And should you have any questions? Then you can always contact the experts at the Ecotest expertise centre.

Specific data

Ecotest is a tool based on practical information, including that of your company. Details about

your company will not be passed on to third parties without your permission. And you can always opt to provide specific data purely for your own use, such as calculating investment decisions.

Here's a list of all the advantages:

- Profit: optimising your business
- A sustainable image and building bricks for your marketing and sales
- Transparent insight into investment decisions
- Transparency towards partners, government authorities and compliance organisations
- A benchmark for your organisation
- Your company's data will not be shared with third parties without your permission
- Support via the Ecotest expertise centre

Discover how **Ecotest** works in just four minutes. **How?** Simple. Just insert the **USB flash drive** in your computer and start the **animation film**.

The film is on this stick!
